Purpose of Contact: Approval to Begin Backfill in the B528 Pit Demolition Site

Discussion

Demolition of the B528 Tank Pit created a large hole requiring backfill media to be placed into the excavation site.

Two additional soil samples were collected and analyzed as requested by the State. One near the OPWL and the second near the bottom of the excavation area. Both indicated non-detect for radionuclide contamination. The RISS Demolition Project requested and was granted approval to begin backfill efforts at the B528 Pit demolition site.

Copies of the analytical data will be included in Appendix III, Miscellaneous Paperwork of the applicable work document.
